Min Jun Kim

(703) 509 1998, mk7pe@virginia.edu

EDUCATION

Aug 2018 – Present

University of Virginia, B.S. Computer Engineering
Charlottesville, VA

- Expected graduation May 2021

SKILLS

HTML/CSS	Experienced	JavaScript (ES8, React)	Experienced
Python (Flask, Django)	Experienced	C/C++	Skillful
Linux Administration	Skillful	Java	Skillful

EMPLOYMENT HISTORY

Jun 2019 – Aug 2019

Instructor, iD Tech Camps
Washington, DC

- Instructed and inspired groups of four to ten students (seven to twelve years old) in computer science and programming principles using JavaScript, Python, Scratch, HTML, CSS, and hardware such as BBC's micro:bit, Anki's Cozmos, and pi-tops
- Explained complex concepts such as object-oriented programming and computer hardware design in simple yet comprehensive terms

Feb 2017 – Jul 2017

Full-Stack Engineer Intern, The Offline Society
Washington, D.C.

- Improved user engagement (visitors per month & average session time) by more than 40% by fixing critical bugs plaguing both the front-end (HTML, CSS/SASS, JavaScript/jQuery) and back-end (Django)
- Provided keener insights into users' activity and preferences by integrating Facebook analytics along with a custom-built online dashboard, and also by integrating FullStory's API, allowing for almost real-time recordings of user sessions
- Maintained the Ubuntu server (installing certificates, upgrading packages, etc.)

RELEVANT EXPERIENCE/PROJECTS

Apr 2019

Bitcamp Hackathon
College Park, MD

- Architected and built both the front-end (JavaScript) and back-end (Python/Flask) of a Chrome extension that helps English-learners understand the varying contexts in which a selected word can be used in

Mar 2019

HooHacks Hackathon
Charlottesville, VA

- Won **Best Education Hack** prize
- Built the front-end (Google AppsScript) and back-end (Python/Flask) of a Google Docs add-on that allows students to instantly transfer pictures from their mobile device right into their document
- Gained over two hundred users with an average rating of five stars on the Add-ons Store!

Jan 2018

Keepsafe

- Wrote a simple command-line file encryption tool in C for the purposes of learning cryptography and advanced C programming

Sep 2017

PennApps Hackathon
Philadelphia, PA

- Built the front-end (JavaScript/React Native) for an iOS app that acts as a wireless controller and listener for a 3D printed lamp which changes color depending on the emotional sentiment of surrounding conversation
